Coding & Solution

Date	8 July 2026
Team ID	SWTID-2026-5447
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below

Solution Summary

Field	Details
Repository Link / URL	https://github.com/NarlaVasudha/Credit-Card-Approval-Prediction
Programming Language(s)	Python
Framework(s) Used	Flask, Scikit-learn, Pandas, Bootstrap
Key Features Implemented	1. Data Collection and Preprocessing 2. Random Forest Model Training for Approval Prediction 3. Flask Web Application for User Input 4. Real-time Prediction Result Display
Pending / Incomplete Features	None – All core features are completed

Setup / Run Instructions	1. Install dependencies: pip install flask pandas scikit-learn 2. Run app: Python app.py 3. Open browser: http://127.0.0.1:5000

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:
The Credit Card Approval Prediction system is fully functional. The application takes user financial details as input and provides instant approval prediction using a trained ML model. The code follows clean coding practices and is well-documented.
