Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S No	Item to Submit	Submitted (Yes/No/NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL (if hosted)	NA
7	APK/Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```

/VasudhaAIML
|---app.py - Main Flask application
|---model.pkl - Trained Random Forest Model
|--- requirements.txt – Python dependencies
|--- README.md – Setup and run instructions
|---templates HTML files
    |--->welcome.html
    |--->form.html
    |--->index.html
    |--->result.html
|---static/ -CSS, Images
|---Testing - Performance testing
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	NA- Running on Localhost
Login Credentials (Demo)	NA
Platform / Hosting Provider	Local – Flask Development Server
Repository Link	https://github.com/NarlaVasudha/Credit-Card-Approval-Prediction
Demo Video Link	https://drive.google.com/file/d/1tspAniL9fN901AAoVXLQvRoMyjgKiZL5/view?usp=drivesdk

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites:

Python 3.9+, pip, VS Code

- Step 1: Clone/Download the repository from GitHub
- Step 2: Install dependencies: `pip install -r requirements.txt`
- Step 3: Run the application: `python app.py`
- Step 4: Open browser and go to: `http://127.0.0.1:5000`

Step 5: Known Issues / Limitations

S No	Known Issue / Limitation	Workaround / Status
1	Running on Flask development server	Use Gunicorn for production deployment
2	Model works only with valid input data	Form validation added
3	Not hosted online	Can be deployed on Render/ Heroku
