

Brainstorming & Idea Prioritization Template

Date	8 July 2026
Team ID	SWTID-2026-5447
Project Name	Credit Card Approval Prediction
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S No	Team Member	Idea / Suggestion	Category	Group No.
1	N Vasudha	Develop a Machine Learning model to predict whether a credit card application will be approved or rejected.	Machine Learning	1
2	P Mahitha	Build a Flask-based web application where users can enter their details and check credit card approval.	Web Development	2
3	N Vasudha	Perform data preprocessing and feature engineering to improve prediction accuracy.	Data Processing	1
4	P Mahitha	Compare multiple machine learning algorithms (Logistic Regression, Decision Tree, Random Forest, and XGBoost) to select the best model.	Machine Learning	1

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Credit Card Approval Prediction using Machine Learning	High	High	1	Yes
2	Flask Web Application with Form for User Input.	High	High	2	Yes
3	Evaluate and Select the Best ML Model using Accuracy	High	High	3	Yes
